Professional Summary

Currently studying Software Engineering at **SMK IDN** Boarding School Solo, I am passionate about turning ideas into impactful digital solutions with a strong problem-solving mindset. I don't just write code, but focus on creating applications that deliver real value and meaningful user experiences. By bridging robust backend logic with engaging **UI/UX design**, I build products that are both functional and visually appealing. I pay attention to performance, scalability, and usability to ensure seamless experiences across different use cases. Continuously learning and adapting, I strive to deliver high-quality digital products that perform as brilliantly as they look.

Technical Skills

Languages & Framework: PHP (Laravel), JavaScript, HTML5, CSS3, Dart (Flutter)

Database Management: MySQL (Relational Database Design, Query Optimization, Migrations, Seeders)

Frontend Technologies: Tailwind CSS, Bootstrap

Design Technologies: Adobe Photoshop, Adobe Illustrator, Figma (UI/UX Design), Canva, CapCut, Affinity

Creative Skills: Visual Branding, Digital Asset Creation, 3D Mascot Design, Prototyping
